FROM

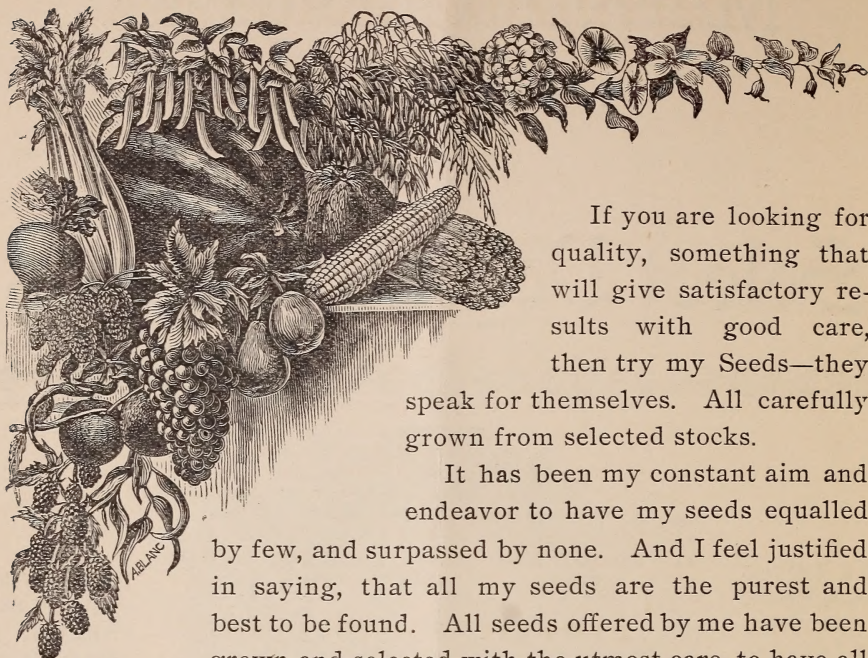

E. E. BURWELL,

Burwell Street,

NEW HAVEN, CONN.

# A Word to the Wise

If you are looking for quality, something that will give satisfactory results with good care, then try my Seeds—they speak for themselves. All carefully grown from selected stocks.

It has been my constant aim and endeavor to have my seeds equalled by few, and surpassed by none. And I feel justified in saying, that all my seeds are the purest and best to be found. All seeds offered by me have been grown and selected with the utmost care, to have all varieties pure and true to name.

## **AND I WILL GUARANTEE,**

That all seeds sold by me shall be as represented ; should they prove otherwise, I will fill the order gratis. But I cannot guarantee more than this, or guarantee the crop in any way, as there are so many causes over which I have no control, that, let seeds be ever so fresh, weather and other circumstances may cause a total failure.

For many years I have made a specialty of Market Gardeners' Seeds, grown from selected seed stocks. The importance of following this system for the production of choice vegetables is familiar to all gardeners ; if the vegetables from which seeds are grown are inferior or impure, so will be their product.

PERFECTION OF QUALITY WITH ME IS OF THE FIRST IMPORTANCE.

I make no charge for packing. Bags charged at cost price only.

Half a bushel will be supplied at bushel rates, half a peck at peck rates, one-half pound at pound rates. Orders for less than one-half peck or one-quarter pound will be charged at quart and ounce prices.

Prices subject to change without notice.

# Fertilizing Materials.

## UNMIXED, OR MIXED TO ORDER.

I have had many years' experience in using Fertilizers of all kinds, and have spent much time and money in experimenting and studying the science of Plant Food. I will now give my customers some of the benefit of my experience. Buying Fertilizer chemicals and material direct from the manufacturers and importers in large quantities, I am enabled to furnish the pure, unadulterated material direct to them at very low prices. I will also mix the Fertilizers for them from my own "Formulas," or as they may wish it, to suit all crops, and in any amount they may wish, charging for the chemicals and a little for my time in mixing and bagging. My "Formulas" have given the best satisfaction to Market Gardeners and Farmers for several years, being composed of the *very best materials*. (No South Carolina rock, acid phosphate, leather, plaster or cotton seed meal, or make-weight of any kind.) In purchasing your Fertilizers in this way, you avoid the possibility of buying inert or insoluble matter frequently found in a ready mixed Fertilizer; matter that may analyze high, but being insoluble in the soil, to plants, is of very little agricultural value. The most economical way of obtaining Plant Food—you obtain much more Plant Food than is commonly found in most high grade mixed goods, and the price is no higher. I will describe what my "Formulas" for general crops are composed of: The nitrogen is in three forms—nitrate soda, pure bone held in form of sulphate, dried blood and meat. These are combined in a way to carry the plant from the start through the entire season's growth. The phosphoric acid is in two forms—soluble from pure bone charcoal dissolved in acid, and the more slowly available raw bone. The "potash" element is supplied in two forms—"sulphate" and "muriate" form. Both furnish Plant Food in an immediately available condition.

### BURWELL'S "FORMULA BB."

#### ANALYSIS.

Nitrogen, Equal to Ammonia.....	4½ to 5½ per cent.
Phos. Acid, Soluble and Available.....	10 to 12 per cent.
Total Phos. Acid.....	12 to 13 per cent.
Potash, Actual.....	5½ to 6½ per cent.

This is my *special* Corn Formula, also adapted to Grass, Grain, Cabbage, Cucumbers, Squash, Onions, etc.

### BURWELL'S "FORMULA AA."

#### ANALYSIS.

Nitrogen, Equal to Ammonia.....	4 to 5 per cent.
Phos. Acid, Soluble and Available.....	7 to 8 per cent.
Total Phos. Acid.....	8 to 9 per cent.
Potash, Actual.....	8 to 9 per cent.

"Formula AA" is my *special* Potato Fertilizer, also adapted to Beets, Tomatoes, Radish, etc.

Fertilizers also specially prepared for **Peas and Beans, Celery and Asparagus**. My Formulas for these crops have been proven by experienced gardeners to give the very best satisfaction.

### BLOOD, BONE AND MEAT.

#### ANALYSIS.

Nitrogen, Equal to Ammonia.....	8½ to 9½ per cent.
Phosphoric Acid.....	10½ to 12½ per cent.

### DISSOLVED BONE, BLACK.

Soluble and Available Phos. Acid.....	16 to 17 per cent.
---------------------------------------	--------------------

### NITRATE OF SODA.

Sodium Nitrate.....	96 to 97 per cent.
Equivalent to Nitrogen.....	15 to 16 per cent

### **SULPHATE POTASH. (*Double Sulphate.*)**

#### **ANALYSIS.**

Equivalent Sulphate Potash.....	47 to 50 per cent.
Potash, Actual.....	25 to 28 per cent.

### **MURIATE OF POTASH.**

Equivalent Muriate Potash.....	80 to 82 per cent.
Potash, Actual.....	50 to 52 per cent.

### **DRIED BLOOD AND MEAT.**

Ammonia.....	12 per cent.
Phosphoric Acid.....	4 per cent.

### **GROUND RAW BONE. (*Strictly Pure.*)**

Ammonia .....	4 to 4½ per cent.
Phosphoric .....	22 to 24 per cent.

### **BONE SULPHATE OF AMMONIA.**

Ammonia.....	25 to 26 per cent.
Nitrogen.....	20 to 21 per cent.

These chemicals will be furnished at the lowest market price for strictly high grade goods, and will be mixed to order in a manner to equal any factory goods. Try a ton on your crops this season, and satisfy yourself of the value of my experience in using Fertilizers.

All prices on chemicals are strictly cash.

## **For House and Greenhouse Plants and Flowers** **USE** **BURWELL'S** **PERFECTION BONE FERTILIZER.**

### **A PERFECT PLANT FOOD.**

Especially prepared for Potting Plants and for general use. Safe, clean, odorless and easy to apply.

Put up in one-half pound wood boxes.

This Fertilizer is prepared from Pure Raw Bone, Potash and Nitrogen, all in the best forms. It is not as *quickly* soluble as some of the Plant Foods now on the market. But is more beneficial, more lasting in its effects and is all available as Plant Food. It is better adapted for Potting Plants, as a small quantity thoroughly mixed with the soil will be sufficient Food for the Plant for three or four months. It is also as well adapted for the Flower Garden as the Window Garden or Greenhouse, and may be used to advantage on all Plants, and in planting seeds, if care is taken in mixing well with soil that none may come in direct contact with seed or plants.

### **PRICE PER PACKAGE 12 CENTS.**

Special prices by the dozen or gross, to Florists and Gardeners.

My prices on Agricultural Chemicals are very low for *first quality* goods. In buying of me you can save money, as I employ no agents, and therefore have no traveling expenses, hotel bills, or rents to pay.

## LAWN MOWERS.

### "THE CAMBRIDGE"

IS THE

**Most Practical Self Sharpening Lawn Mower on the Market.**

The stationary knife is of peculiar form, being concave, and by means of the adjustment the edges of the revolving knives and bottom knife are brought in contact in such a manner as to invariably keep the machine in excellent condition.

The adjustments are extremely simple, and nothing but first-class material is used in its construction. We fully guarantee every machine, and a single trial will demonstrate that anyone can operate this mower and do satisfactory work with less labor than any other mower on the market.

**Extra Parts always on hand.**

Warranted perfectly pure.

#### CYCLONE EXTERMINATOR.

**Improved. Price reduced to \$4.75.**

With the improvement in this Paris Green Duster, two rows can be gone over at the same time, applying the Paris Green directly to the vines. It entirely does away with the necessity of using water, plaster, or any other bulky adulterant; simply from one to one and a half pounds of Paris Green to the acre, blown on the vines by this fine distributor, completes the whole business. In an hour an acre can be readily gone over, and as much of the arsenic in the Paris Green is dissolved by water the vines are never injured in the least.

No back aching lugging of water or plaster. They pay for themselves in a few hours in the saving of labor. Every one who grows potatoes should order one.

#### RUBBER HOSE.

The very best quality 3 and 5 Ply Hose in the market at lowest prices. Also, Hose Nozzles, Hose Bands and Menders, Hose Washers, Hose Couplings, Lawn Sprinklers, Lawn Mowers, Lawn Fertilizers, etc. Can save you money on these goods.

#### NURSERY STOCK.
